User Panel Interface

The heart of DippCapitals Investments crafted with state of the art technology to the letter, to rival conventional standards.

•Designed for everyone

The synergy between our intuitive user-interface and aesthetically pleasing user-experience provides a condition for its users to make, monitor and earn from investments safely, effectively, and efficiently while enjoying the experience.

•All the tools you need

DippCapitals investments' user panel, provides you with features required to exert full autonomy on your investments.

•Responsive Design

Renders perfectly on a variety of devices and browsers. Providing you with optimized design and performance necessary for usability and satisfaction.

Dual Investment Options

Our company offers three investment plans.

•All-in-one

Our investment plans were specifically tailored to meet the investment needs of all and everybody. So everyone gets a chance at a piece of our Global pie.

• Convert. Scan. Pay.

Your inputted US Dollar amount is first converted to your preferred payment digital currency, then you're just a scan away from making your investment deposit.

•Earn as you go

Payout for investments can be made daily as long as your accumulated revenue is equal to or greater than the minimum daily withdrawal for your investment plan of choice.

Multiple Cryptocurrency Investment

Making life easy for our investors, we embedded in our platform the option to invest with multiple digital currencies – with zero fees.

- Automatic conversion

Your inputted US Dollar amount is automatically converted to your preferred payment digital currency, to ease payment.

- Simple to manage

Managing of multiple cryptocurrency investments have never been easier as all investments are left in their initial USD amount and the digital currencies are only considered as payment methods.

live and invest. We believe that DIPPCAPITALS factors are going increasingly mainstream and can be used to drive investment outperformance.

Investing for a sustainable future

The era of green bonds has arrived. We are seeing the increasing use of bond markets to raise capital to fund the low-carbon economy, especially from the issuance of 'green bonds'.

While many in the fixed income market are grappling with green bonds, others are working out how best to incorporate broader environmental, social and governance DIPPCAPITALS strategies into their portfolio, a task rapidly growing in importance.

Why does it matter?

DIPPCAPITALS changes are happening faster than ever, reshaping how people live and invest. We believe that DippCapitals factors are going increasingly mainstream and can be used to

drive investment outperformance.

Making the first step right is crucial to the long road of investments. Of the five steps, the first is to assess your risk tolerance and decide the most suitable asset allocation for yourself.

Different people have different attitudes towards investment. Some are not willing to take any risks or withstand losses, and therefore would rather forgo potentially higher returns. Some are willing to take some risks but tend to avoid

huge volatility. Some are willing to take risks in exchange for returns that outperform the markets.

How to gauge one's risk tolerance? Look at your investment horizon. Put it simply, the longer your investment life, the higher the risk you can take because you can afford the time to last a cycle, which helps smooth out short-term volatility. For instance, a young person just starts working, who is still far from retirement, can take more risk.

Sustainable investing

On the contrary, the shorter the investment period, the lower the risk one can take. Assuming you are going to retire next year, and not receiving any regular income, you just do not have the time to recover all losses if your investments take a nosedive all of a sudden.

Besides, your risk tolerance is dependent on your life goals. Ask yourself if you need to set aside funds for your children's education? Are you going to buy a property in the near future? These factors will have an impact on your cash flow. After all, we all need to reserve some cash at all times just in case there are emergencies.

Balancing risk and return is the key to long-term investment

Isn't it perfect to have an investment tool that always tops the performance league, and investors can stay worry-free just by holding it? The truth is that there are ups and downs in all economic cycles and the markets are capricious. Even investment experts find it hard to predict the performances of all asset classes.

Based on historical data, the same asset can perform drastically differently during different investment cycles. The best-performing asset in 2017 can turn out to be the worst laggard in 2018. That suggests no particular asset can be an all-time winner.

Investors should therefore avoid putting all eggs in one basket but allocate assets across different sectors and geographies. That could help diversify the risk of an investment portfolio, and capture investment opportunities at different times for more stable returns in the medium- to long-term.

To make diversification works, an investment portfolio should include assets that are complementary, that tend to react differently to the same macro condition. More precisely, some negative elements in the market might cause an asset to decline sharply, but pose little threats to another. In the world of investment, such pairs are called lowly-correlated assets. They can effectively balance the risk and return of an investment portfolio.

Portfolio management

Rebalance your portfolio: restore the original allocation

In the investing journey, investors should start off by constructing a portfolio that accommodates their investment objectives and risk profiles. However, setting up the initial asset allocation is merely a starting point. It is equally important to regularly rebalance the portfolio to ensure the asset weightings are consistent. Overlooking the need to rebalance the portfolio can prevent investors from achieving their long-term investment goals.

Market changes shift portfolio away from initial objective

In an investment portfolio, the relative weights of different asset classes may change due to market fluctuations, which lead to a shifted asset allocation that deviates from the original target. In this case, rebalancing the portfolio will mean restoring the weightings of portfolio assets to the original designed levels.

Hedge Funds and Private Equity

The Company's investments in externally managed private equity funds and hedge funds, as well as private equity direct and co-investments.

The portfolio seeks to maximize risk-adjusted returns and diversify exposure by industry and geography, while giving the Company a global view of the alternative investment landscape.

With our archiving capacities and constant education of our staff, monitoring ever changing regulations and global finance requirements we are sure we can be a valuable ally in your expansion.

Investment Management

In 2015, the Company established the Investment Management division formerly known as Principal Investments and began its evolution into a leader in alternative investing. Investment Management leverages the Group's expertise, network, and financial strength to seek attractive risk-adjusted investment opportunities across global markets and sectors.

This includes the Company's internally managed strategies, corporate holdings and cash. We actively manage all sub-portfolios and carefully use derivatives and hedging to increase returns and manage risk.

Hit your investment targets with the right approach

Once you have identified your investment targets, you can put your cash into different asset classes and construct a portfolio based on your risk tolerance. The idea of asset allocation is to include equities, bonds and other investment tools in a basket. Since different investment vehicles come with different risk-return profiles, asset allocation is never easy.

Generally, the higher the potential return of an asset class, the higher the risks it carries.

Capital Markets

With different packages, our system is modelled to accommodate everyone no matter how much you have to invest.

A Team of Professionals.

With our team of professionals, our investment strategies guarantee you a considerable return on investments to secure your future.
